

LIFETIME GUARANTEE:

Phillips Square-Driv® Exterior and Composite Screws will not rust or cause staining for the lifetime of your project. The proprietary Durafast® coating is formulated to prevent rust and corrosion and not cause staining or streaking. This coating will not prevent staining or streaking related to normal extractive bleeding or weather and surface punctures on woods that have not been properly treated and sealed.

Phillips Fastener Products guarantees our Phillips Square-Driv® Exterior and Composite Screws will not rust in ACQ, CCA, Pine, Cedar, and Redwood. Phillips Square-Driv® Exterior Screws will work in other types of lumber as well. Call for verification of any specific wood type. This guarantee is for the life of the project and is contingent upon proper installation and construction. Material and labor will be reimbursed as deemed appropriate by our claims adjuster to return the structure to proper condition. In the 12 years that we have marketed these products we have not had an unsatisfied customer claim.

Although our lifetime guarantee is against rusting only, Phillips Fasteners believes in 100% customer satisfaction. If any customer is unhappy with the performance of a Phillips branded product they should call our corporate office at 1-888-332-6283 or email us at service@phillipsfastener.com .
